DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Europe on 3/15/04. It is noted, however, that applicant has not filed a certified copy of the 03100664 application as required by 35 U.S.C. 119(b).

Specification

2. The abstract of the disclosure is objected to because a US copy has not been received.

Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1 and 14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1 and 14 are drawn to a mathematical algorithm, per se. Claims to processes that do nothing more than solve mathematical problems or manipulate abstract ideas or concepts are non-statutory. If the "acts" of a claimed process manipulate only numbers, abstract concepts or ideas, or signals representing all of the foregoing, the acts are not being applied to appropriate subject matter. This, a process consisting solely of mathematical operations without some claimed practical application

is drawn to non-statutory subject matter. In this case, the claims merely recite the steps of summing frequency component, calculating a correction factor and correcting each summed frequency component, without any practical application being recited.

Dependent claims 2-13 and 15-16 are rejected because they further limit their parent claims.
